

Part No. FTT-32-54

# LARGE DIAMETER CABLE SHEAVE WHEEL

For Heavy Use!

This sheave wheel is a welcome tool for any down-hole & well pulling operations! The sheave wheel's large diameter eliminates armor separation of the cable, while the spring tension roller guides keep the E.S.P. cable from jumping the wheel. An absolute must for lead flats & recommended for round cable as well.

CAN BE BUILT EXTRA WIDE FOR NEW CABLES WITH CHEMICAL INJECTION TUBES.
